

Matrex®

Frp wall panels are often used in the back rooms of commercial facilities, in kitchens, storage rooms and other non-public areas. Now frp has a new look and can be used in the front room – dining rooms, lobbies and other public access areas.

The frpDesign Solutions *Matrex* panel has a high gloss decorative surface in solid colors. Matrex fiberglass reinforced plastic (frp) panels are available in sealed simulated grout lines, or without grout lines, and are easy to install and maintain.
