

ARDEX P 82™ Ultra Prime

This high-strength, solvent-free primer improves the adhesion of ARDEX products over smooth, non-absorbent substrates as well as wooden subfloors and other non-water-soluble adhesive residues.

Product Capabilities:

ARDEX P 82 is a high-strength, solvent-free primer that improves the adhesion of ARDEX products over smooth, non-absorbent substrates such as ceramic and quarry tile, terrazzo, marble, and metal decking. ARDEX P 82 is also used over wooden subfloors including plywood and strip wood, and over cutback and other non-water-soluble adhesive residues.

Standard absorbent concrete substrates must be primed with ARDEX P 51 PRIMER. Please refer to the ARDEX Technical Brochure for more information.

Benefits:

- For non-porous substrates, wood, cutback, and metal substrates
 - Ready-to-use two-component primer
 - Seals the substrate
 - Improves the bond of ARDEX underlayments and toppings
 - Use for interior floors only
