

ARDEX FORTI FINISH™ High Strength, Self-Drying Finishing Underlayment

A strong, durable, and fast-setting finishing patch that is especially suited for the high traffic, heavy loads and hard wheels associated with gurneys and patient beds in hospitals and other health care facilities.

Product Capabilities:

A self-drying cement-based polymer modified, trowel grade underlayment that provides a smooth, highly durable finish for use over concrete substrates prior to the installation of vinyl and other floor coverings in the most demanding environments. Developed specifically for use in hospitals where heavy, rolling loads are common, ARDEX FORTI FINISH allows for the installation of most types of floor coverings in as little as 15 to 30 minutes over concrete and prepared adhesive residues on concrete.

Benefits:

- High compressive strength, over 7,800 psi
- Exceptional bond strength
- Smooth existing concrete prior to installing vinyl and other floor coverings in critical areas
- Easy to mix and apply
- Mold and mildew resistant
- Will NOT contribute to staining of floor coverings
- No primers or additives necessary

In addition to being ideal for hospitals, assisted living centers, and other health care facilities, ARDEX FORTI FINISH is excellent for use in other high traffic, heavy load areas such as grocery stores, convention centers, hotels, entertainment facilities and schools.
