

FOR BEAUTIFUL CAR WASH WALLS USE KEMPLY® WITH FLUTED POLYPROPYLENE

Abuse Resistant frp

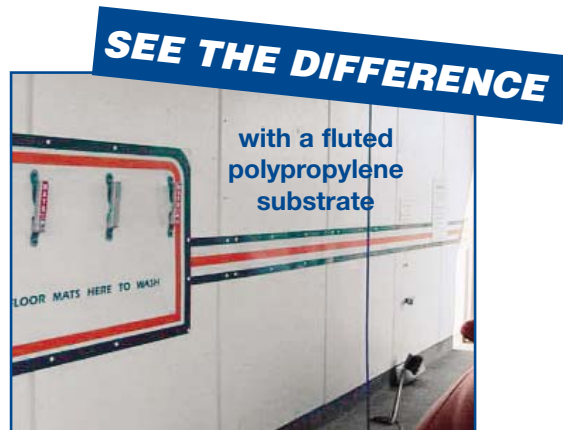

Fluted Polypropylene

CAR WASHES CERTAINLY TAKE A BEATING

With constant water saturation, you need a wall that is going to stand up to excessive moisture and weather variations.

Kemply has always been a great solution for areas that face heavy moisture because of its unique Surfaseal® finish, which seals the surface, preventing moisture from seeping into the panel. No moisture means no mold, mildew, or bacteria growth, which leaves you with attractive, low maintenance walls!

Kemply made with a fluted polypropylene substrate has the structural strength you need, and will prevent/minimize buckles in the walls.
