Museums/Cultural Centers	H

**H = Highly Recommended**  
The best flooring choice(s) for the space.

**R = Recommended**  
Flooring choice(s) that are suitable for the space.

**N = Not Recommended**  
Flooring that should not be used for the space.

The ratings of H, R or N are based on an evaluation of the performance, cost and aesthetic requirements of the space.

### NOTES:

- Numerical footnotes apply to the space requirements
  - Alpha footnotes apply to the product's suitability for the space
- (1) Aseptic Area — Hygienic conditions are of critical importance
  - (2) Water Resistance — Wet area installation is needed (flash coving, sealed seams).
  - (3) Slip Retardance — A more secure walking surface is required
  - (6) Not recommended in areas that require electrostatic discharge control
  - (a) In most cases veterinary applications are similar
  - (b) Only operating rooms not requiring conductive flooring
  - (e) Armstrong floors are not recommended for commercial kitchens and commercial food processing areas, including behind fast-food counters
  - (g) Most Armstrong floors are not recommended for heavy industrial areas
  - (i) No standing water; walk-off mats required
  - (l) Not recommended in laboratories that require special decontamination procedures on surfaces, including foyers

### In addition to spaces listed on this chart:

- Armstrong floors may be used on stair steps, risers and landings. A manufactured slip-retardant nosing should always be applied on steps
- Armstrong floors are not recommended for exterior use, for interior spaces where pointed spike golf or track shoes will be used, or in areas where the floor will be subjected to unusually concentrated static or dynamic loads
- Armstrong floors should not be used as wall covering or wall surfacing
