

# NFPA 1951 Utility BDUs and Jumpsuits

Also Certified to NFPA Requirements for Wildland Fire Fighting and Station Uniforms

- Tri-Certified
- Patented Product Improvements
- More Custom Fitting
- More Options
- Quick Delivery
- Excellent Pricing

**American Firewear is Proud to Introduce Our Newest Offering Designed to Meet the Utility Level Requirements of the Newly Published 2007 Edition of NFPA 1951 Standard on Protective Ensembles for Technical Rescue Operations\***

These new garments are available in both Jumpsuit and BDU (Battle Dress Uniform) styles and are tri-certified to the following NFPA standards:

- NFPA 1951 Technical Rescue Operations – Utility Garments
- NFPA 1977 Wildland Fire Fighting
- NFPA 1975 Station and Work Uniforms for Fire and Emergency Services

**Uniquely Designed to Meet the Needs of the First Responder Marketplace, these BDUs and Jumpsuits Offer:**

- **Tailored to Fit** Garments that are fit to the individual NOT to standard Small, Medium, Large and XL patterns. Finally First Responders can get garments that not only fit their needs but fit them comfortably.
- **Completely Customizable Garments with Quick Delivery** – Departments can choose from a huge selection of custom options to design these garments based on the job that needs to be done. From Urban Search and Rescue to Confined Space to Auto Extrication – our automated factory means we now have the ability to design the garment to meet the needs of the first responder while providing increased safety and comfort QUICKLY.

**Both Utility BDUs and Jumpsuits are Also Certified to:**

- **NFPA 1977 Wildland**
- **NFPA 1975 Station and Work Uniforms**

**\*Note:** "USAR" is NFPA 1951, 2001 edition, term for a protective garment with many (but NOT all) similarities to the 2007 edition Rescue and Recovery garment. Since the 2001 edition of NFPA 1951 is no longer current, usage of this term should be avoided and the current edition term "Rescue and Recovery" should be used to describe 2007 edition products.

# NFPA 1951 Utility BDUs and Jumpsuits

## Patented Features that Increase Comfort and Safety:

**Full Range of Motion Crotch Design (F.R.O.M.)** – This standard patented feature is proven in field test after field test and offers the widest range of motion available in first responder PPE. This feature was designed to aid in mobility and movement in all of the day-to-day activities that first responders come up against.

**Forward Flex Sleeves** – This standard patented design facilitates arm motion, especially forward arm motion, without restriction and is a feature in both the jumpsuit and BDU shirt configuration of the NFPA 1951 Utility Garments.

**Optional BiFlex Knees (highly recommended custom option on either garment)** – This new streamlined design provides increased padding and protection to the highly impacted knee area – and with the removable BiFlex Knee option, departments can dramatically impact the wear life and comfort of their gear.

**Note:** Many other patented options also available.

## BDU Standard Configuration:

BDU Pant:

- Front Slash Trouser Pockets
- Zipper Fly
- Full Range of Motion Crotch Design
- Positive Closure Snap at Waist
- 7 Belt Loops
