

## Our Commitment to Thinking Green and Building Green

At Owens Corning, we strive to meet today's building needs without compromising the world we leave to the future. Sustainability is at the heart of how we do business. And this commitment to thinking and building green is also evident in the design, manufacturing processes and people behind our Cultured Stone® and ProStone® brands.

### Products for a sustainable future.

**Recycled content.** We incorporate a minimum of 35% pre-consumer waste stream material into all our Cultured Stone® and ProStone® products.

**Superior durability.** Our products stay beautiful and are capable of 50+ years of service. Superior quality control measures, quality raw materials, and industry leading testing provide the confidence to offer a 50-year limited warranty\*. We meet or exceed the most stringent building code testing requirements in the industry, including the ICC AC-51. This testing has been evaluated and confirmed by ICC Evaluation Services and documented in ICC ESR 1364. Once installed, our products don't require painting, coating or sealing.

**Low emitting.** Our products have demonstrated through third-party testing to meet the indoor air quality standards of the GREENGUARD Environmental Institute. In addition, we have met the even more stringent GREENGUARD Children & Schools<sup>SM</sup> standard, which represents the most rigorous building product emissions criteria to date.

### Processes for a sustainable future.

**Protecting well-being.** We operate our manufacturing facilities in a manner that protects the health of our employees and the environment.

**Recycling water.** We've implemented a closed-loop system that allows us to reuse water during manufacturing. As a result, we reduced our water consumption in North America from 2006–2007 by 42% per ton of product produced.

**Waste reduction.** We've implemented process changes that reduced our landfill waste by 56% per ton of product produced since 2006.

### People making the world a better place.

**Championing greener communities.** We believe that being good neighbors is a requirement, not an option. It's reflected in the way we encourage our employees and retirees to give back to the communities in which we operate. And this includes sharing our knowledge to help create a sustainable future.
