

Panelfold®

Moduflex® Series 800 Partitions NRC .80 STC 51 Panels

Series 800 Partitions with a sound-absorbing perforated steel face on one side are now rated STC 51 and NRC .80. The NRC rating was obtained on the very same panels used in the fully operable 14' x 9' STC test. NRC and STC test reports available online at panelfold.com.

NRC .80 STC 51 perforated panels may be arranged with all of the perforated faces toward one room or alternating between rooms. Surfacing material applied over the perforated faces must be acoustically transparent fabric or carpet.
