

IFS Single Phase Simplex Demand/Timed Dose

- Designed to control one 120/208/240V single phase pump in water and sewage installations.
- Digital display is standard feature.
- Panel configuration can be easily converted in the field to either demand dose or timed dose.
- Includes float switches.

IFS Single Phase Duplex Demand/Timed Dose

- Designed to control two alternating 120/208/240V single phase pumps in water and sewage installations.
- Digital display is standard feature.
- Panel configuration can be easily converted in the field to either demand dose or timed dose.
- Includes float switches.

IFS Three Phase Simplex Demand

- Designed to control one 208/240/480V three phase pump in water and sewage installations.
- Optional display board has elapsed time meter and cycle counter indicators.
- Includes float switches.

IFS Three Phase Duplex Demand

- Designed to control two alternating 208/240/480V three phase pumps in water and sewage installations.
- Optional display board has elapsed time meter and cycle counter indicators.
- Includes float switches.

IFS Single Phase Simplex Capacitor Start/Run

- Designed to control one 120/208/240V single phase pump in water and sewage installations.
- IEC motor contactor controls pump by switching electrical lines.
- Capacitor start module - must be ordered separately or supplied.
- Includes float switches.

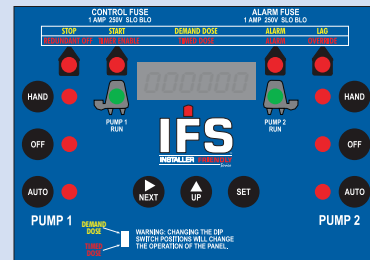

IFS Single Phase Duplex Capacitor Start/Run

- Designed to control two alternating 120/208/240V single phase pumps in water and sewage installations.
- IEC motor contactors control pumps by switching electrical lines.
- Capacitor start module - must be ordered separately or supplied.
- Includes float switches.

Installer Friendly Series® Control Panels

The Installer Friendly Series® control panels utilize embedded circuit board technology to provide greater control of septic systems via a **simple-to-use touch pad** on the inner door for programming and monitoring pump and float operation for on-site applications.

Touch Pad Display Features:

- Easy programming for pump control
- Pump run indicator(s)
- Float status indicators, including float out-of-sequence alarm
- HOA pump control switch(es)
- Hand mode safety feature
- 6 digit LED display includes:
 - Elapsed time meter(s)
 - Cycle counter(s)
 - Alarm counter
 - Lead/lag selector toggles pump operation in duplex models
 - Float error counter
 - Override counter in timed dose models

IFS Panel Features:

- NEMA 4X weatherproof enclosure
- Inner door for added safety
- Innovative circuit board design offers a clean installation
- Separate control and alarm fuses
- Digital display is a standard feature on select models
- Panel can be easily converted to either demand dose or timed dose in the field on select models
