# FUSION

Having the right equipment for the job is just as important as having the right pipe, fittings and fabrications.

That's why ISCO offers the industry's largest selection of HDPE fusion equipment available from the best manufacturers – for purchase or rental.

## WHATEVER YOUR FUSION JOB, WE HAVE THE EQUIPMENT:

### McElroy Manufacturing, Inc.

- Butt Fusion Equipment
- Socket Fusion Equipment
- Sidewall Fusion Equipment
- TracStar Machines
- MegaMc Machines

### Plus

- Electrofusion Equipment
- Handheld Extrusion Welders
- Hot Air Guns
- Spark Testers

## A complete line of fusion accessories and special tooling:

- Squeeze off tools
- Split Ring Heaters
- DataLoggers
- Pipe cutting tools
- Test Caps
- Pyrometers
- Internal and external bead removers
- Pipe straightening equipment

## RENT IT RIGHT, RIGHT NOW!

Depending on the frequency of need, many companies choose to rent fusion equipment for the length of their projects. ISCO inventories the largest McElroy equipment fleet for rental in

North America, with units available to fuse pipe diameters from 1/2" to 65". We have many strategic rental locations throughout the nation, all featuring newer equipment including the new McElroy TracStar line of self-propelled and self-contained units. All of our equipment is quality checked and pre-serviced so it is user-ready before arriving at your site.

## SALES, PARTS AND SERVICE

ISCO stocks McElroy equipment from five sales locations, and has three McElroy Certified Service Centers. We also stock a complete inventory of fusion parts, even hard to find parts. Other services include machine and tooling rebuilds, as well as heater recoating. ISCO is a McElroy MegaMc Distributor, and a McElroy Charter TracStar Distributor. Customers are encouraged to ask about financing plans, as well as trade-in and equipment upgrade programs.

## TRAINED TECHNICIANS AND JOBSITE TRAINING

We can also provide experienced, factory-trained fusion technicians to accompany any purchased or leased machine for on-site training nationwide. These technicians are also OSHA and Confined Space Certified.

## FUSION HELP; A PHONE CALL AWAY!

Need help fast? Customers can call our Fusion Troubleshooting Hotline at 1-800-345-4726 • Ext. 4790. Qualified fusion technicians are on hand Monday through Friday 7:30 a.m. to 5:00 p.m. EST to answer any questions about equipment operation, fusion techniques or to address problems.

## THE ISCO FUSION ACADEMY

We conduct fusion schools throughout the year at many of our locations, featuring free presentations, manufacturer-sponsored displays, and hands-on instruction to teach HDPE fusion techniques on the latest fusion equipment.

Many key manufacturers

endorse and participate in the school, and FusionAcademy students earn certificates acknowledging their completion of the fusion course. Call for the next session scheduled for your area.

## YOUR FUSION CONNECTION

Sales, rental, service, parts and more. Call ISCO today for all your fusion needs at 1-800-345-ISCO (4726).
