LANDFILL

ISCO – the single source for landfill needs

The use of high-density polyethylene pipe (HDPE) in landfill applications has set new standards for performance, durability, ease of installation and value.

ISCO Industries is the landfill specialist, able to supply today's new or evolving landfill with literally all the pipe, fittings, services and fusion equipment associated with HDPE applications – including a diversity of landfill products for the collection of leachate and methane gas.

Large inventory of pipes & fittings

ISCO is one of the largest distributors of HDPE, with sizes available from 1/2" to 63" in a varying range of dimension ratios (DR), along with fittings to meet any requirements. We can provide perforated HDPE and PVC pipe from 4" to 12" in diameter, with perforations as close as 2 1/2" on center, in addition to having slotting capabilities. ISCO can also supply PVC pipe and fittings where required.

Fusion services

ISCO rents, services and sells quality McElroy fusion equipment (from 1/2" to 63") in a wide range of models and sizes. We are also an authorized McElroy service center and refurbish facility, and stock a complete inventory of fusion equipment parts – more than anyone else.

No one has more fusion experience than ISCO, and we have fusion technicians on-call for your next project. On-site fusion training is also available. Please contact your ISCO representative for more information.

Quality and expedient custom fabrications

If it can be drawn, ISCO can fabricate it – including the fabrication of dual-wall or double-wall containment pipe. Ask about expert customized fabrication of:

- Manholes
- Tanks
- Lift stations
- Liner penetrations
- Slide slope risers
- Knock outs
- Drip legs
- And more...

Landfill accessory items

ISCO stocks a full line of landfill accessories, including: fittings, valves, valve stem extensions, hoses, clamps, gauges and much more.

CAD drawings for quality assurance

Our skilled engineers use the latest technology to design the most cost effective HDPE fabrications – customized for each landfill application.

Knowledgeable landfill experts

ISCO's Landfill Division is staffed with industry experts with a keen understanding of landfill construction and management – and how HDPE is applied across all facets of system design.

National distribution sites

ISCO has stocking locations throughout the United States, inventorying large stockpiles of pipe, fittings,

accessories and fusion equipment – usually within one day's delivery of most projects.

Your landfill connection

Successful landfill management requires the skill and technology provided by expert partners like ISCO Industries, dedicated to delivering quality products and services. Make ISCO your single source for all your HDPE needs by calling 1-800-345-ISCO (4726).
