

BLÜCHER® Pipe

BLÜCHER®

K E E P I N G U P T H E F L O W

STAINLESS STEEL DRAINAGE SYSTEMS

A worker in a white hard hat and shirt is working with stainless steel pipes. The background is a solid blue color. The worker is wearing a white hard hat and a white t-shirt with a circular logo on the chest. The pipes are arranged in a way that shows a T-junction and a straight section.

BLÜCHER® Pipe

Reliable connections

BLÜCHER® Pipe offers the most complete product offering of stainless steel drainage pipes and fittings in the market. Through three basic characteristics, specifically

- ✓ **LIGHT-WEIGHT**
- ✓ **NON-COMBUSTIBLE**
- ✓ **EASY TO INSTALL**

every BLÜCHER® Pipe drainage product is designed to keep up the flow through reliable connections while adding value and longevity to your drainage projects, installations and business.

Minimum manpower and installation time saves money

Installing the BLÜCHER® Pipe push-fit drainage pipework system is easy. Combined with the low weight of stainless steel, installation does not require lifting devices. Compared to solutions in cast iron, a BLÜCHER® Pipe solution is only a third of the weight. Compared to a similar solution made in plastic, welding is not necessary. Furthermore, you need only one bracket per 10' (3m) length of pipe, and a complete installation can be carried out by one man alone. BLÜCHER® Pipe is a push-fit drainage pipework system that requires less labor, thereby saving time and money.

Standard and customized products

The BLÜCHER® Pipe push-fit drainage pipework system includes a complete product line of pipes, bends and branches available in both acid-resistant AISI 316L as well as in regular AISI 304 stainless steel. Standard diameters are 2" (50mm), 3" (75mm), 4" (110mm), 5" (125mm), 6" (160mm), 8" (200mm), and 10" (250mm), with lengths ranging from 6 inches (.15m) to 20 feet (6m). Access pipes, rat stops and adapters are also part of the program, as well as the electric or manual BLÜCHER® pipe cutter that customizes lengths and prepares pipe ends for jointing.

On our website you will find the complete BLÜCHER® Pipe product offering as well as selected references and applications.

Customized items are available on request.

Stainless steel - the sustainable and hygienic choice

Because of its corrosion and fire resistant properties, as well as its hygienic and environmental advantages, stainless steel is the material of choice for the BLÜCHER® Pipe drainage pipework system.

The pipe penetrations are class A0 to A60 tested and meet the highest fire safety requirements in the marine industry [IMO res. A.754(18)].

In regard to sound improvement, BLÜCHER® Pipe is tested at the Fraunhofer Institut in accordance with EN 14366, and it complies with the DIN 4109 standard. Furthermore, stainless steel is 100% recyclable, non-toxic, and its smooth surface guarantees maximum flow capacity and the best possible hygiene.

The BLÜCHER® Pipe drainage pipework system is produced in stainless steel because it is the safe, sustainable and hygienic material of choice if the objective is to achieve drainage that flows efficiently from the start of a project and way into the future.

Wide range of applications

The BLÜCHER® Pipe drainage pipework system can be used above and below ground, and it offers viable and economical solutions for HOUSING, COMMERCIAL, INDUSTRIAL and MARINE applications.

Commercial

The light-weight push-fit system combined with the exceptional fire resistant solution make BLÜCHER® Pipe the preferred pipe system in projects around the world. Hospitals, schools, airports and other commercial customers are among our loyal clients.

Industrial

The food, beverage and pharmaceutical industries value in particular the hygienic and sustainable BLÜCHER® Pipe solution. The smooth stainless steel surface and high flow capacity prevent deposits inside the pipework system, and the stainless steel provides a solution, which requires a minimum of maintenance and offers maximum longevity. In AISI 316L steel the pipe system also provides a durable solution for the chemical industry.

Marine

The BLÜCHER® Pipe drainage pipework system is completely interchangeable between vacuum and gravity systems for black- and grey-water in marine applications. Shipyards and owners all over the world depend on the longevity, low weight and fire-resistant, hygienic and reliable BLÜCHER® solution for their sanitary discharge system.
