STAINLESS STEEL DRAINAGE SYSTEMS

# BLÜCHER® Channel

## The sustainable choice

Based on 40 years experience in the production of stainless steel drainage solutions, BLÜCHER® offers trench drainage systems and kitchen channels to suit any drainage requirement. Especially through three basic characteristics:

**HYGIENIC**

**NON-COMBUSTIBLE**

**RECYCLABLE**

## Stainless steel lasts forever

Because of its corrosion and fire resistant properties, as well as its hygienic and environmental advantages, stainless steel is the material of choice for BLÜCHER® Channel.

Stainless steel is 100% recyclable, non-toxic, and its smooth surface guarantees maximum flow capacity, minimum maintenance and the best possible hygiene.

## Standard or customized

The BLÜCHER® Channel product offering includes a complete line of channels and kitchen channels from light to heavy duty. Available in acid-resistant AISI 316L or regular AISI 304 stainless steel.

All accessories like gratings, filter baskets and water traps are also part of the standard program.

The BLÜCHER® Channel product offering is produced largely from 12ga. (2mm) stainless steel providing the highest levels of stability and durability. Discharge of liquids at temperatures up to 248°F (122°C) will not influence the material.

On our website you will find the complete BLÜCHER® Channel product offering as well as selected references and applications.

Our technical experts will assist you in selecting the right solution. Standard or customized.

## Freedom of choice

A variety of channel sizes and gratings provide flexible solutions for commercial and industrial applications.

### Trench Drain & kitchen channels

Trench drain and kitchen channels are suitable for concrete, tiled, epoxy and flexible sheet floors.

Among the numerous advantages of the BLÜCHER® Channel are:

- Hygienic frames reinforced with synthetic resin infill
- No corners or cavities inside
- Perfect surface finish
- Grating lock system
- Gratings for any load class

### Making the right choice

Our technical experts are always willing to assist you in selecting the right channel for your requirements, based on:

- Water flow
- Waste products
- Weight load
- Floor covering
- Membrane type

## Meets any drainage requirement

The BLÜCHER® Channel product line fulfills any indoor linear drainage requirement. From IKEA to CocaCola. From Russia to USA.

### Commercial

The excellent hygienic properties with smooth surfaces preventing bacterial growth and blockages make BLÜCHER® Channel the preferred trench drain and kitchen channels in projects around the world. Accessories like removable water traps, filter baskets and HygienicPro grating ensure easy cleaning and high hygiene. Therefore hospitals, schools, airports, restaurants and other commercial institutions are among our loyal clients.

### Industrial

The food, beverage and pharmaceutical industries value in particular the hygienic and sustainable BLÜCHER® Channel solution. The stainless steel provides a solution, which requires a minimum amount of maintenance while offering maximum longevity. The long product life expectancy ensures a cost-effective installation, and in AISI 316L steel the drains also provide a durable solution for the chemical industry.
