900 MHz Wireless

The Broadcastvision Entertainment 900MHz Transmitter is a digital transmitter that uses 900MHz frequency to transmit the audio wirelessly from a TV or any audio source with an audio output jack to a Broadcastvision receiver. With a transmission range of more than 35,000sq/ft and 32 channels to choose from, the 900MHz transmitter offers high quality 900MHz frequency audio for maximum reception. Users simply plug their headphones into Broadcastvision stationary receivers that are attached directly to the cardio equipment. Choose between our feature-loaded 10-key receiver or our new simplified Retro receiver. Both receivers allow the user to access both 900MHz and FM frequencies, and are compatible with other manufactured 900MHz and FM products.
