

## Add an FSR Table or Wall Box

Elegantly mount any gooseneck microphone with this T3-MJ mini table box. Available with one or two control buttons for momentary or maintained controls.

The T3U-2 tilt up table box handles data, power, A/V connections and is designed expressly to provide multiple access in one table.

T3-AC2 table box is essential for convenient table top access. The 3 1/2" stylish box is unobstructive and can be matched to any d cor.

The WB-PR4G four gang, locking wall box protects your network, connectors, or control plates in one sturdy wall box. The entire wall box series addresses the

rising issue of network security with models featuring a locking metal door. Available with or without a clear acrylic window in models with two or more gangs.

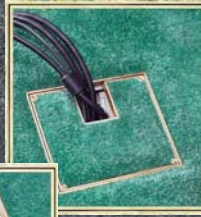

## Stage Boxes

One piece all welded design providing both strength and ease of installation. Cover is painted with Sandtex for a non-skid finish, available in black or oak.

## Built for all Venues and all Surfaces

- Easily accessible floor boxes provide practical solutions for cable storage.
- A large hinged section of the cover folds back to allow full access to internal cables and connector plates.
- A smaller hinged trap door fastens back to create an efficient cable exit.
- Cable storage in the box allows unencumbered travel. ADA compliant.
- All Steel construction.
- Brass or aluminum low-profile edging blends seamlessly into decor.
- Hand mitered carpet edges provide elegant finishing touches.
- 11 gauge steel covers installed flush with floor - only hand mitered carpet edges visible when boxes are idle.

(\*) These boxes are designed for the new UL safety standard for scrub water. The standard only applies to boxes installed in concrete, not raised access boxes.

## FL-G Series

- ✓ Designed for flexibility, durability and style.
- ✓ Rugged units safely handle the rigors of high traffic floor environments.
- ✓ Easily installed in poured concrete applications.

The RFL-AV's

## Raised Floor Boxes

The all metal construction provides one or two cable access doors, or a solid metal cover.

FSR's Raised Access Floor Boxes are designed to handle a variety of connections and applications.

The RFL Series of Floor Boxes is available in many sizes and depths. The all-metal construction is built to handle the rigors of a floor environment, yet blends into the floor pattern.

The beveled steel carpet rim is available standard in gray, black or clay. We will provide custom finishes to match your design. Covers are available with one or two access doors, or a solid metal cover.

The RFL-AV's

## The FLH20 "Super" Floor Box

When Performance Counts!

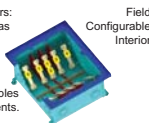

The FLH20 High Load Capacity Floor Box combines rugged construction and an elegant design for carpeted and non carpeted floors. Perfect floor box for ballrooms, convention spaces and high traffic areas where heavy equipment such as forklifts, automobiles, scissor lifts and portable stages are used.

The FLH20 "Super" Floor Box can hold the weight of a charging RHINO!

Compartment Dividers: Remove or arrange as needed to isolate compartments.

Center Dividers: Remove to run cables across compartments.

The FLH20-1 is designed to meet H20 load ratings using a type 6061 T6 heat treated aluminum cover with an integrated carpet flange and cable exit doors. The two cable exit doors feature FSR's exclusive three position cam locks which allow One Click operation to open the cable door.

## SmartFit™ (Poke-Thru)

It's Not Just Power Anymore!

FSR SmartFit is an innovative system that provides flexible power and AV solutions for fire rated poke throughs. The SmartFit system features a universal cover assembly and multiple sub-plates that install on the fire rated poke throughs.

With the SmartFit system, FSR delivers one consistent look for installations with power and audio/video requirements. There are sub-plates available in the SmartFit line, a Dual Decora and 3-IPS-insert sub-plates.

## New UL Requirements

UL has added a new requirement for UL listing. Boxes to be installed in concrete must pass a scrub water test. FSR passed the test and exceeded the specs. Our boxes are approved, not only for carpet over concrete, but wood and tile as well. Please note that the scrub water requirement is only for boxes in concrete. It is not a requirement for raised access or stage floors.

The FSR Pour Pan is the answer to Floor Box installations that are on grade. If your application is a poured concrete floor and the box rests on soil, rock or gravel, you must first install the Pour Pan.
