

# MX-950 (The Aurora)

Theater & Seating by CinemaTech Inc., [www.mycinemattech.com](http://www.mycinemattech.com)

*The MX-950 is slim and sleek but packs enough power to totally control and automate hundreds of devices throughout your home. It's fully scalable, so it's perfect for use as a Master Remote for large systems with complex home theaters and many secondary systems throughout the house. Ergonomically sculpted for easy one-hand operation, the MX-950 provides "activity based" menus. Simply press the WATCH button to see a list of what you can watch (TV, DVD, DVR, and so on). When you feel like listening to music, simply press the LISTEN button to reveal your audio options. It's entertainment made simple.*

**COMPLETE  
CONTROL**

**UNIVERSAL**<sup>®</sup>  
remote control

*Your professional installer can create custom labels for every menu page, including the intuitive WATCH and LISTEN menus.*

*The MX-950 has a unique shape that fits comfortably in either hand. It's powered by a rechargeable Lithium Ion battery that provides long life even with heavy use. And unlike some other battery types, it has no "memory" so the MX-950 can be kept on the charger at all times without degrading the battery. The charger base indicates when the battery is charging or fully charged.*

*An internal motion sensor detects any movement of the MX-950 and automatically turns on the menu backlight. The menu screen area is backlit for easy viewing even in total darkness. And the hard-buttons are lighted, too, for convenient use in dim light.*

*The MX-950 even has a built-in speaker, so your installer can program it to signal the end of a automation routine with a beep, a tune or recorded speech!*

### **MRF-300 Multi Zone RF Base Station**

*Your system becomes complete when you add at least one MRF-300 Base Station. It includes a controller and moveable antenna and allows your installer to "hide the wires" and fine tune the system for perfect remote control performance. With an MRF-300, the power of your remote can be expanded to control any system. It's entertainment made simple.*
