ROOMPRO ONE

Finally, An Affordable All-In-One Classroom Solution!

No more pieced-together systems. With RoomPro ONE, you get one system, one solution!

Now you can get a fully integrated classroom control and microphone system in one low-cost solution with the all-in-one RoomPro ONE. Designed with your K-12 classroom in mind, RoomPro ONE combines an easy-to-use classroom control system with a high-quality infrared microphone system. What's more, RoomPro ONE installs almost effortlessly with its one-of-a-kind ceiling enclosure that integrates speakers, audio amplifier, A/V switcher, and projector mount: All In One.

KEY FEATURES:

Give your teacher full control of the classroom at the touch of a button, with RoomPro's teacher-friendly, easy-install wall panel.

RoomPro ONE's built-in infrared (IR) microphone system offers optimized voice enhancement for an optimal auditory learning environment.

Engineered for quick installation, RoomPro includes a one-of-a-kind ceiling enclosure that attaches cleanly to the ceiling and integrates speakers, audio amplifier, A/V switcher, and projector mount—all in one.

Receive unparalleled audio and video quality through RoomPro's unique, low-voltage design that automatically converts audio and video signals to run over CAT5 cabling of up to 150 feet!

No programming required! RoomPro is conveniently pre-programmed to your projector's specifications for instant out-of-the-box use.
