

## Manzanita™ Routing Switchers

**Manzanita routing switchers are a reliable, compact solution for:**

- Broadcast studios
- Post-production facilities
- Remote trucks
- Duplication houses

### **Overview:**

Sierra Video's 1RU analog audio and video routing switchers are a perfect solution for video environments that need to keep tabs on multiple video sources. These one- and two-output routing switchers are an ideal fit for high volume broadcast and post-production facilities where signal monitoring and/or maintenance are crucial.

# Manzanita

## Routing Switchers

### Manzanita 161VS

905135

16 x 1 composite video routing switcher with stereo audio has 16 terminating video inputs and one video output

- Stereo audio follow (AFV)
- External power supply

RS-232 serial control  
230 VAC input

803140  
903135-30

### Manzanita 321V

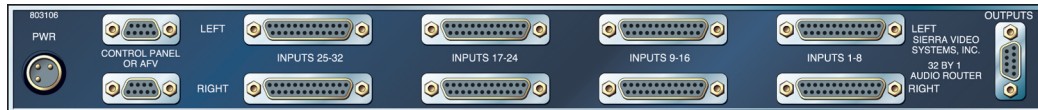

903101

32 x 1 composite video routing switcher has 32 terminating video inputs, two video outputs

- RS-232 serial control
- External power supply

230 VAC input

903101-30

### Manzanita 321S

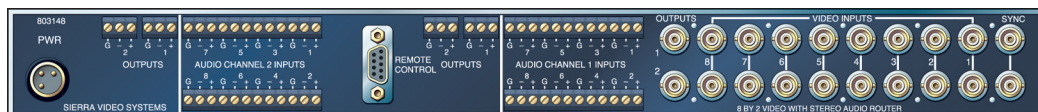

903105

32 x 1 stereo audio routing switcher can be used by itself or as an audio follow for the Manzanita 321V

- External power supply

230 VAC input

903105-30

### Manzanita 82VS

903149

8 x 2 composite video with stereo audio routing switcher has eight looping video inputs

- Two independent switching busses with one output per bus
- External power supply

RS-232 serial control  
230 VAC input

803640  
903149-30
