

Optimum Ergonomics

Meet the MX-700

“The Ferrari of Hand-Held Remotes”

That's a quote from the review of the MX-700 at the web's most popular information site on remote controls (RemoteCentral.com). The MX-700 has been lauded in dozens of publications from the Robb Report to Electronic House magazine. The MX-700 provides you with automation and control of a home theater beyond anything you thought was possible. Isn't it about time to make your home theater a one touch haven?

THEATER
MASTER®**

Entertainment Made Simple™

MX-700 Solo - Home Theater Automation

One Touch Home Theater Automation!

Automation Using Custom Programming

Extensive Automation with Macros

The powerful memory of the MX-700 offers over 900 potential macro buttons. Each of these macros can play back a sequence of programmed commands that completely automates a complex system with one button press. A macro button can record and play back up to 190 steps with time delays between steps as well as jumping to a new scene when desired.

Replaces Twenty Remote Controls

The MX-700 controls up to 20 components. Each of the 20 components can be programmed with up to 4 pages of LCD screens plus the 34 hard buttons. The MX-700 allows the installer to edit the text on each LCD screen exactly as you prefer (up to 87 screens with 870 text buttons are available). Whether you prefer single screen simplicity or total replacement of the original remotes, the MX-700 will exceed your expectations.

Windows Based MXEditor PC Software

The MX-700 and its MXEditor software package contains over 1,500 "code sets" of Brand/Models including hard to find and specific discrete codes that allow for precise control of all system components. The MX-700 also has the ability to learn over 1,500 new commands. MXEditor can also be used on a Mac, if the user has a Windows 98, ME, 2000 or XP emulator.

Memory Back-Up

The MX-700 system features a smart flash memory back-up system that will retain the programmed memory for up to ten years, even with dead batteries.

One Hand Ergonomics – Easier to Use than Original Component Remotes!

The optimized layout enables you to naturally reach both the thumbpad and hard buttons to navigate on-screen menus and the critical Transport, Channel and Volume controls. You'll quickly discover that you prefer using the MX-700 to control all the special features of your system (especially personal video recorders, satellite receivers, DVD players, surround sound receivers and digital cable boxes). There will never be a reason to dig out the old remotes again.

EL Back Lighting

The bright backlight using the latest EL technology enables you to use the remote in the dark easily.

GemStone™ Buttons

Unlike standard rubber buttons, these GemStone buttons provide the ultimate in tested reliability, give a secure tactile feel and possess a more elegant look.

Warranty

One year parts and labor.

Specifications

MX-700 Remote Control
