

TX-1000 (The Medius)

The TX-1000 revolutionizes home theater operation with its large, backlit LCD touch-screen display that features labels that are easy to read from a distance—even without your glasses. The menus can be customized to meet the needs of every member of the family. Anyone who prefers to operate their system from the coffee table will appreciate the TX-1000's revolutionary “tablet style” approach.

**COMPLETE
CONTROL**

UNIVERSAL[®]
remote control

Fully digital, the TX-1000 provides remarkable accessibility through a backlit graphic interface that has been optimized for table-top use. No need to pick it up—no need to put on your reading glasses—even in complete darkness. Simply press the WATCH button to see a list of what you can watch (TV, DVD, DVR, and so on). When you feel like listening to music, simply press the LISTEN button to reveal your audio options. Custom programmed by your professional installer, the TX-1000 takes care of everything for you. It's entertainment made simple.

Hard-buttons are crisply laser-etched with full text—no more cryptic icons, no more searching for the PLAY button. The hard-buttons are all clearly labeled with words—to watch your DVD simply press the button labeled PLAY.

Powered by inexpensive AA batteries, the TX-1000 will retain all programmed instructions for up to ten years—even if the batteries fail or are removed.

MRF-300 Multi Zone RF Base Station

Your system becomes complete when you add at least one MRF-300 Base Station. It includes a controller and moveable antenna and allows your installer to “hide the wires” and fine tune the system for perfect remote control performance. With an MRF-300, the power of your remote can be expanded to control any system. It's entertainment made simple.
