Video Combiners, Modulators

HVM-1008
HVM-1001 (1 input, 1 output)
**HVM-1401 (4 inputs, 1 combined output)**

Video Combiner Module

The video combiner module is designed to combine modulated signals from eight locations into a single output. The output signal can fit into an HVM-1308 Aux input port to distribute those modulated signals from anywhere in the house such as DVDs, VCRs or cameras.

RF Modulator

The digital RF modulator easily allows converting any audio and video signal to a user-programmed UHF or CATV channel. It provides flexibility when using either networking video cameras or traditional RCA video products. Channel Range UHF 14-69, CATV 70-94 & 100-125 10db gain.
