- Wire Stripper
- Lanyard Attachment
- 4 inches
- 6.9 ounces

Clever
Leatherman's three-in-one design gives you a can opener, bottle opener and wire stripper in just one blade. It keeps the tool lightweight while adding more functions.

Durable
Leatherman scissors are strong enough to cut seat belts, fishing line, zip-ties and fabric. In fact, our scissors can open and close over 44,000 times and still perform as well as they did on the first cut.

Strong
We already had the strongest pliers out there, but now we've redesigned them to withstand 133% more squeezing load.

Sharp
Our 420 stainless steel knife is precision ground while immersed in coolant for the sharpest blade possible. The cutting edge on the Blast knife blade does not come in contact with the inside of the handle—something that can dull knives when folded for storage.

Detailed
Our interior blades rotate individually, letting you easily grab one tool at a time. It's one of the many Leatherman details that guarantee your multi-tool is ready to work every time you need it.

Precise
Screwdrivers are ground for sharp edges. This extra manufacturing step lets you hold a screw better and reduces slippage.

Efficient
Open-tooth saw blades get off to an easy start and resist "filling up" when working through wet wood or other sticky substances.

New Jaw Design
Our new jaw design includes wire cutters with 58% more cutting area than before. Leatherman's wire cutters can repeatedly cut 12-penny nails and still cut the finest monofilament you can find.

Zytel® Grips
Blast's new handle design with Zytel inserts provides a comfortable grip whether you're working for a few minutes or a few hours.

Removable Bit Driver

(Sold separately)

Even more features are quickly added to Blast with Leatherman's Removable Bit Driver. The driver fits easily over Blast's Phillips screwdriver blade, letting you switch bits and be ready for any situation.

The Removable Bit Driver is sold with bits that are engineered and manufactured to Leatherman's exacting standards. Made from S2 Tool Steel, they are 35% stronger than stainless. A zinc coating makes them even more corrosion resistant. All are ground to perfection, with a Rockwell hardness of HRC59.

Hex 4mm and 5mm

Hex 6mm and 1/4"

Torx #10 and #15

Phillips #0 and #3

Screwdrivers .075" and .200"

Blast™ Lock System

Blast features all-locking blades that are over 50% stronger than our original locks. The new design is easy to release for quick folding.

Sharper and Bigger than Competitive Multi-Tool Knives

Compared to other multi-tools in the same price range, Blast features the largest knife blade.

■ Blast

■ Competitor blade

Leatherman has engineered a longer knife blade that still fits in a compact multi-tool. You'll get the benefit of a longer cutting edge that can slice through any amount of work.

The Leatherman Difference

Leatherman is known for producing the world's most precisely engineered multi-tools. Tim Leatherman's manufacturing standards remain unmatched in the industry today. With our newest line of products, the Leatherman tradition of innovation, tight specifications and strength continues to endure.

Our expertise doesn't end with our tools—it also shows in our service. Competitive pricing, prompt delivery, excellent customer service and outstanding warranty support round out our dedication and commitment to you.

The Leatherman Warranty

Leatherman Tool Group, Inc. proudly stands behind our products. If you ever have a problem with a genuine Leatherman tool, you can count on us to make it right with fast warranty service for a full 25 years from the purchase date.
