

- USB Plug and Play Direct Connection for the Sony NW-E003 Walkman® MP3 Player
- Bluetooth® Connectivity for Wireless Music Streaming Playback
- Vertical Loading CD Player
- 50 Watts Total: 25 Watts per Channel x 2
- CD-R/CD-RW with MP3 and ATRAC3® Playback Capability¹
- S-Master® Digital Amplifier
- FM/AM Tuner

Features

- USB Plug and Play allows you to enjoy music from your Sony NW-E003 Walkman® MP3 Player at home by connecting directly to the USB port of the CMT-U1BT. You can control the Walkman player functions through the micro system, display song titles and artist and can also charge your Walkman player just by having it plugged into the USB port.
- Bluetooth® Connectivity Allows you to stream music, wirelessly from your Bluetooth® enabled PC and Sony Erickson phone or MP3 player with an optional Bluetooth® adapter (sold separately).
- Vertical Loading CD Provides direct access to insert or replace CD's.
- 50 Watts Total: 25 Watts per Channel x 2 Plenty of power for small rooms or offices.
- CD-R/CD-RW Playback Compatible¹ Plays all CD-R/RW discs burned either in a PC or a home recording deck. Create custom mixes from your existing music collection and always have the right music at hand.
- MP3 Playback The player will decode and play back MP3 files that have been recorded onto a CD-R/RW¹ disc. This allows the customer to record hours of music from their PC onto a CD-R/RW disc.
- Bass Reflex Speaker Design A speaker enclosure that includes a "tuned" port to increase and extend bass response (by releasing some of the energy created by the inward movement of the woofer cone).
- 3-Line Large Display Allows you to see plenty of information at a glance, no more squinting for your favorites from the music library on your MP3 player. The smooth half mirror design has the same look and feel as the NW-E003 Walkman® MP3 Player.
- S-Master Digital Amplifier More efficient than traditional analog amplifiers by using less energy to produce the same signal. The audio benefits are higher resolution sound quality, monitored noise reduction and accurate sound reproduction.
- Silk Soft Dome Tweeter Reproduces high-value natural and smooth treble because of the delicate silk and powerful magnet. This technology is usually used in high-end HiFi speakers.
- Horn Duct Amplifies bass sound without generating noise, through the horn duct, contributing to a richer bass sound.

Specifications

Micro Sound Station

General

Tray Type: Vertical loading
 Disc Capacity: 1
 Type of Use: Desktop Micro System

Audio

Tuner Type: FM/AM
 Sound Enhancer: DSGX (Dynamic Sound Generator X-tra), Mega Bass®
 Station Preset(s): 30 (10 AM, 20 FM)
 CD Play Mode(s): Program(25-step), Shuffle, Repeat

 FM Lead Antenna

1. CDR/RW media/formats are not universally compatible.
2. User available memory = 1,015,726,080 bytes, a portion of which is used for data management functions.
3. Calculated based on 4 minutes per song in ATRAC @ 48kbps.
4. Does not support secure WMA and AAC files purchased from other music services. Only plays back unsecured WMA and AAC files ripped from CD.
5. Up to 28 hours continuous playback with built-in Lithium-Ion battery (fully charged) when playing back in ATRAC3plus™ at 48kbps.
6. Ability to use Bluetooth® enabled products with other devices may vary as not all Bluetooth® devices are compatible.
7. Not all products with USB connectors may communicate with each other due to chip set variations.
