DECORATIVE NOISE REDUCING WALL PANELS

---

# Acoust-X™

## WALL SOLUTIONS

**ALPRO Acoust-X** noise-reducing wall panels provide effective acoustical relief and decorative appeal for busy spaces. Square, multi-faceted panels reflect light, creating a 3-D illusion, while absorbing reverberant noise.

**Acoust-X** panels, available in a variety of sizes and finishes, can be used in groupings to create your own acoustical wall arrangements, or hung individually for optimal acoustical performance and space utilization.

## DESIGN

**Acoust-X** panels are modular acoustical panels fabricated of 22 gauge perforated, smooth galvanized steel and contain PVC encapsulated sound insulation. Panels are fully assembled and ready for hanging on the hanger strips provided.

All panels are 2" thick to accommodate the 2" x 1.5 lb density sound insulation.

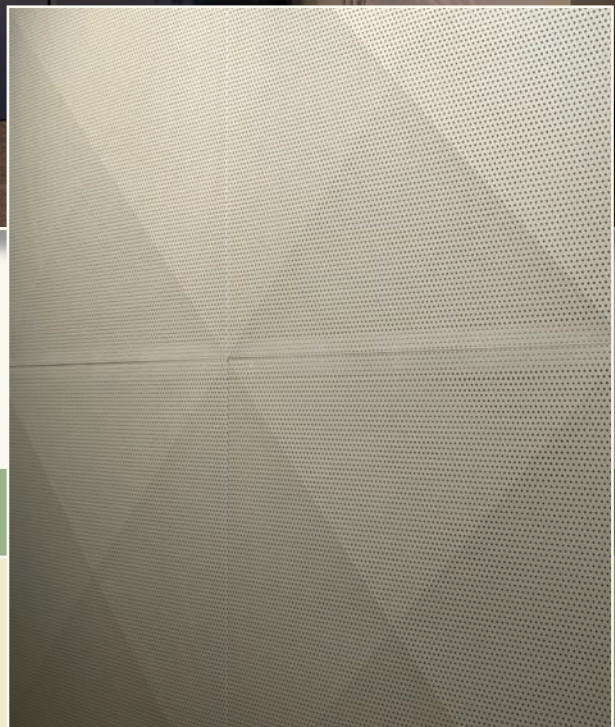

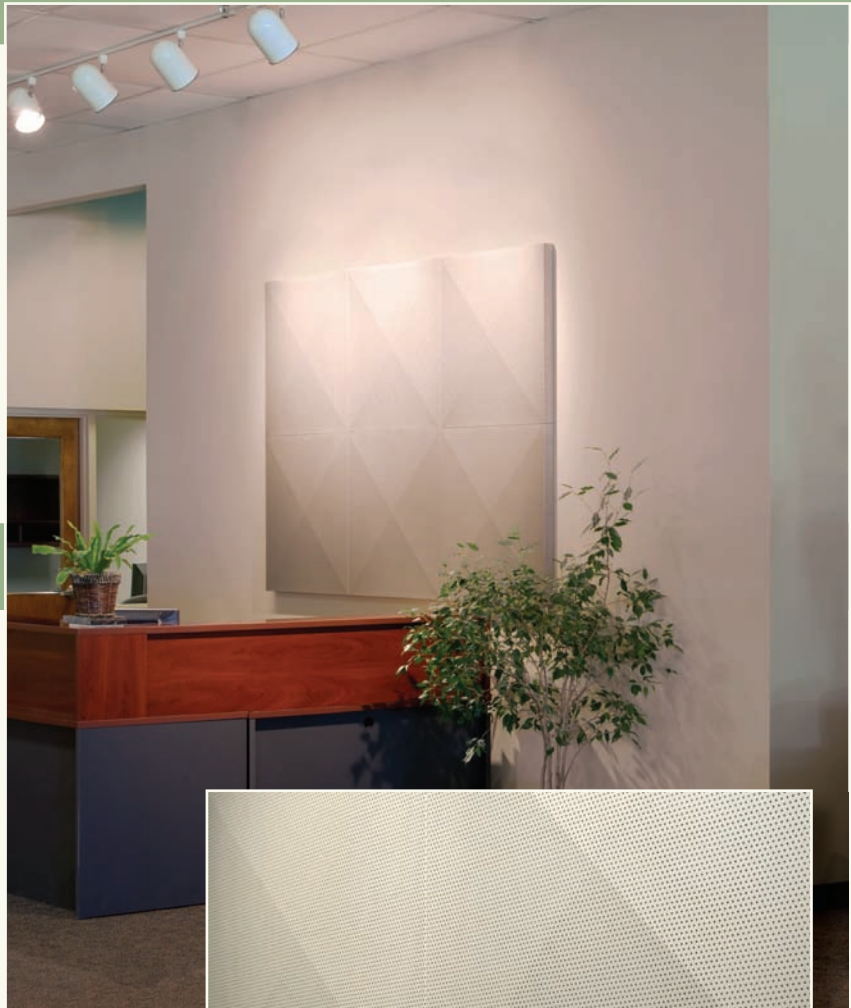

SIZES	Weight (lbs.) / each:
18" x 18"	5.5
24" x 24"	8.0
30" x 30"	11.75
36" x 36"	16.0
48" x 48"	26.25

If acoustics are not required, non-perforated panels are available.

## FINISHES

Unlike fabric panels, the powder coat finish on **Acoust-X** panels is easily cleaned and durable, making them practical for any environment.

- Standard Powder Coat
- ACROGUARD® High Performance Powder Coat
- REVELATION™ Wood and Stone Finishes
- Custom

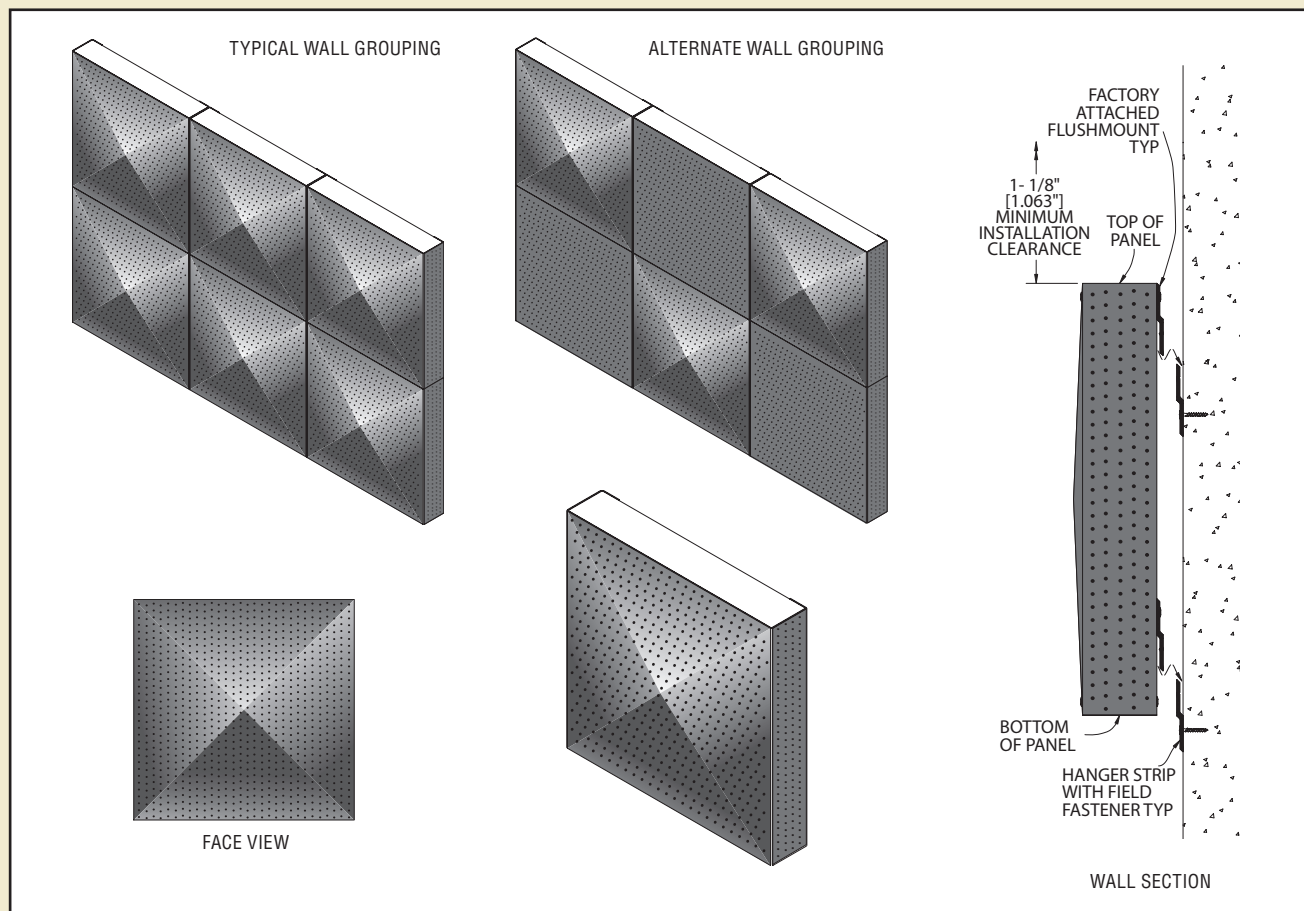

## APPLICATIONS

**Acousti-X™** panels provide effective sound attenuation as well as an attractive decorative appearance to rooms and spaces where aesthetics are important, such as:

- Lobbies
- Reception Areas
- Conference Rooms
- Waiting Rooms
- Lounges
- Restaurants

## DETAILS

## GREEN BY DESIGN

- LEED®<sup>1</sup> credits available
- Finishes
  - No phosphate / biodegradable pre-treatment
  - No hazardous waste
  - No VOC's
  - No heavy metals

<sup>1</sup> LEED® is a registered trademark of the U.S. Green Building Council.
