

# RACK OPTIONS

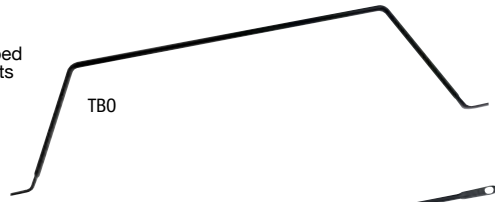

## TB tie bars

Economical and efficient cable management.

**NEW** 4" offset "L" shaped tie bar with multiple slots

**TBO** 4" offset tie bar for rear cabling and stress relief.

**TBA** Thick aluminum tie bar for both vertical and horizontal cabling.

**TBS** 1/4" round tie bars for small horizontal cabling

**TBS**

**TBL** "L" shaped tie bar with multiple slots for larger vertical or horizontal cabling

**TBA**

**TBL**

**TBLO**

## LCS lacer strip

11-gauge steel; mounts vertically to rack rail supports providing abundant cable management. Can be cut to any length up to 78 3/4".

**LCS**

**LCS1**

## FL floor levelers

Set of 4 floor levelers, threaded posts fit all GAR and KAR racks. Adapter plate included.

## MPS modular power strip

Raxxess MPS Modular Power Strips offer system designers and installers a unique and powerful solution for integrating AC power into rack systems. Available in two lengths (32.5" with up to 7 receptacles & 64" with up to 14 receptacles), each strip can be custom configured and built to order. Using our supplied design template, a designer can specify the location, type and current rating of each receptacle, as well as designate its circuit number. Multiple circuits, receptacle types and current ratings can all be combined in a single strip. There are over 1,000 possible configurations available. Constructed of 16-gauge powder-coated steel, each MPS features a unique cable management channel and plenty of tie-off points for keeping AC cable bundles segregated from audio and control cables. MPS strips mount vertically inside our commercial enclosures. Standard termination options include color-coded and labeled pigtails and junction boxes.

### features

- 32.5" (7 devices) or 64" (14 devices)
- Multiple circuits
- Choice of receptacles - Edison 15 or 20 amps, TT-30, L5-30, Isolated Ground, IEC 320, Hospital Grade
- 20 and 30 amp sequencing power modules available for MPS with TT-30, L5-30 and duplex receptacles

LPPS-3  
Length: 24"

LPPS-6  
Length: 36"

LPPS-9  
Length: 48"

Not Shown: LPPS-12  
Length: 60"

## LPPS low profile power strip

Raxxess Low Profile Power Strips are available in a variety of sizes, equipped with up to 3, 6, 9 or 12 Edison duplex receptacles. Each model is available with up to 3 circuits in 15A or 20A current ratings. Easily installed in the rear of our commercial enclosures, the space-saving design allows for ample clearance for mounted equipment and accessories. An integrated cable management channel runs the length of each strip, providing multiple tie-off points to keep AC cables segregated from signal and control cables.

### features

- Twelve foot, 14-gauge AC cord
- 8 unevenly spaced outlets
- Front mounted circuit breaker
- Spike RFI and EMI protection
- 15 or 20 amp rating

## PD-800, PD-800L, & PD-800VM rack mount power distribution

The PD-800 power conditioners offer an economical rack mount power distribution solution. Features include surge and spike protection, as well as EMI/RFI filtering for clean AC power. The PD-800L features pullout lights with an on/off switch and dimmer control. The PD-800VM features a volt meter and pull-out lights. All three models feature thoughtful outlet placement so you don't have to give up an outlet if you use a wall-pack. A front mounted 15A circuit breaker and a heavy-duty 12-foot power cable are included for your convenience. Now available with additional front outlet.
