VIEWERS REACH
A NEW
LEVEL OF
PERFORMANCE
WITH SILVERSTAR

Since its introduction in 2004, SilverStar™ has become the new standard of flat video projection screens by delivering the ultimate in picture quality: bright colors, high contrast and a 180 degree viewing area. It's a true high definition screen.

SilverStar's superior performance derives from its innovative, patented technology—a silver base material combined with multiple optical layers to provide a gain of 6.0. This increases color saturation while expanding contrast in controlled or ambient light without hot spotting.

A comparison of the SilverStar screen with the old industry standards of matte white and enhanced gray demonstrates the superiority of SilverStar.

The unretouched photograph above has been projected on to SilverStar, Matte White and Enhanced Grey projection screens.

	DIAGONAL	VIEWING AREA
16:9	92"	45" x 80"
	103"	50.5" x 90"
	110"	54" x 96"
	123"	59" x 105"

	DIAGONAL	VIEWING AREA
2.35:1	129"	50.5" x 118.75"

Custom Sizes Available

The advantages are visible to the naked eye: SilverStar produces more vivid colors and a broader contrast range. Whites are whiter and fine details are visible in black. Viewers gain a new dimension in definition in the bright new world of HD.

As the most advanced screen on the market today, SilverStar can be multi-plexed to form theater sized screens. There are no limits to the versatility offered by SilverStar, making it ideal for home theater systems and retail display as well as command and control, religious and educational venues.

"I HAVE TO WATCH MY ENTIRE DVD COLLECTION OVER AGAIN. I CAN'T BELIEVE HOW MUCH DETAIL I LOST WITH THE OTHER SCREEN."
