

## High Definition Rear Projection Screen

Fusion-HD by Vutec is a rigid acrylic rear screen, representing the latest engineering advancement in rear-projection screen technology. Fusion-HD performance begins with a superior (2.0 gain) image and a high contrast ratio that is designed for today's High Definition movies and high resolution image files.

Fusion-HD has a wide viewing angle for unequalled (180°) off axis viewing, with excellent ambient light rejection for multi-room or display applications. Fusion-HD delivers whiter whites and crisp, color saturation— even in uncontrolled lighting environments. Its durable scratch resistant multi-layer design diffuses the image evenly across the entire screen surface to create exceptional screen uniformity, clarity and high image resolution.

Fusion-HD can be custom designed to fit any application with a pre-assembled frame, or can be suspended from any ceiling structure. Standard sizes include: 16:9, 2:35:1 and 4:3 aspect ratios: Up to 163" (D) in 16:9 and 133" (D) in 4:3. Custom sizes are available.

### FEATURES

- Rigid, multi-layer, acrylic rear screen system
- Gain (2.0)
- High contrast, clarity and color saturation
- For use with all High Definition movies and high resolution image files.
- Wide viewing angle for unequalled (180°) off axis viewing
- Excellent ambient light rejection
- Durable scratch resistant design
- Available in 16:9, 2:35:1 and 4:3 formats
- Can be custom designed to fit any application with a pre-assembled frame, or can be suspended from any ceiling structure
- Optional pre-assembled SF Frame available

### DIAGONAL SIZES

Standard (4:3) : 50" - 133"

HDTV (16:9) : 92" - 147"

Widescreen (4:3) : 115" - 153"
