

*A better solution for the containment of flammable wastes and flammable corrosives.*

**Justrite's Liquid Disposal Cans** are made of high density polyethylene for superior chemical resistance and leak protection. Large and strategically placed opening offers controlled filling and pouring during disposal. Justrite's unique patented, current-carrying, carbon insert imbedded into the container allows for proper grounding (see page 58 for example). Fixed position on handle allows lid to stay open for easy pouring. When closed, the cap automatically vents between 3 and 5 psig (0.2 and 0.35 bar). A stainless steel flame arrester guards against outside ignition. Stainless steel hardware offers excellent protection against corrosives.

Poly cans come in safety red or translucent white which allows quick visual inspection of liquid level. **Model 12772** offers dual convenience of collecting liquids and withdrawing liquids in one single container.

**Model No. 14265 and 14565** have a built-in polyethylene drum fill gauge indicator that pops-up to warn you when the container is almost full.

### *Drain Cans for easy collection of used solvents.*

Easily and safely collect used solvents from parts washing equipment with a **Justrite Drain Can**. Wide-mouth funnel catches drainage with no spill, no mess. Removable funnel is plated steel. Built-in flame arrester keeps fire from contents. A 3/4" threaded plug allows safe disposal of waste liquids from the drain can into a permanent receptacle. Optional Drain Can Cover fits on top of funnel to keep out dirt.
