Patent Pending

The Best Fitting Work Vest Harness On The Market Now Meets Multiple High Visibility Standards.

- Integrated Delta™ II harness and work vest allows fast, simple and safe donning – just like putting on a jacket
- Neon yellow and orange work vests designed with reflective tape to meet ANSI/ISEA and CSA Class 1 and 2 standards for high visibility
- Blue cotton model is ideal for workers in cooler climates
- Lightweight and unique polyester fabric provides exceptional breathability for enhanced comfort
- Five point adjustment and sizes ranging from Small to XX-Large provide a perfect fit for almost any worker for added comfort and safety
- Available with quick-connect, pass thru or tongue buckle leg straps to suit any worker's needs
- Stand-up dorsal D-ring with keepers maintain D-ring location outside of vest ensuring fast and safe connections
- Internal mesh lining and snap attachments hold the shape of the vest and allow easy inspections of webbing and harness components
- Soft elastic edging around the arms and neck reduce chaffing for added comfort
- Built-in sub-pelvic strap on the harness ensures proper distribution of forces during a fall for added safety
- 420 lbs. capacity makes it the most versatile work vest and harness combination on the market today
- Meets all applicable industry standards including OSHA, ANSI/ISEA 107-2004, ANSI Z359.1-2007, CSA Z96-02, and CSA Z259.10

SUPERIOR INTEGRATION, MULTIPLE FEATURES

Our unique combination work vest and harness provides the user the safest option on the market today. Competitive models sacrifice adjustability, comfort and most importantly safety. The new Delta Vest™ harnesses incorporate all the safety and features of our best selling Delta™ II harness with a completely re-designed work vest. The integration provides the user with the ultimate fit, comfort and safety that personnel have become accustomed to from DBI-SALA.

The Delta Vest™ allows the user to don their harness like a vest, saving time and adding productivity throughout their day. In addition, the High Visibility models were designed to meet both ANSI/ISEA 107-2004 and CSA Z96-02 Class 1 and 2 standards for high visibility, providing an excellent option for those requiring reflective work wear with their fall protection.

Our work vest is constructed from lightweight, breathable, yet extremely durable polyester with a heavy-duty smooth operating zipper. It is ideal for those working at heights in or around construction, utility or traffic applications. In addition, the Delta Vest™ work vest and harness combination is easy to clean - just throw it in the washer. The DBI-SALA Delta Vest™ combines the highest quality fall protection harness and hi-vis work vest for the ultimate in no-tangle donning and comfortable security.

Applications Include:

- Bridge Construction, Maintenance and Inspection
- Commercial Construction
- Utility and Municipality Activities
- Railcar and Truck Loading, Unloading and Servicing
- Aviation Maintenance
- Marine Transit Operations/Maintenance
- Mass Transit Vehicle Maintenance
- Oil and Gas Exploration and Refining

Soft Edging
Elastic arm and neck edging moves with you to reduce chafing.

Heavy-Duty Zipper
Durable construction holds up to the elements making donning simple and fast. The zipper ends at the chest strap to reduce potential of choking during a fall.

Built-In Pockets
Chest pockets with pen holder and lower pockets provide convenient and safe item storage.

Mesh Lining
Internal mesh encompasses shoulder straps holding the harness in place so it can be donned like a vest. Snap connection ensures all straps can be properly inspected.

Perfect Fit
Incorporates 5-points of adjustment including torso adjusters not found on competitive models. Simply open the vest and adjust for a perfect fit every time.

High Visibility
Hi-Vis models feature reflective tape to meet ANSI/ISEA 107-2004 and CSA Z96-02 Class 1 and 2 standards.

Stand-Up Dorsal D-Ring
Spring loaded D-ring ensures fast, easy and safe connections.

D-Ring Keepers
Holds dorsal D-ring in place preventing it from slipping into the vest.

420 lb. Capacity
For added jobsite flexibility.

Sub-Pelvic Strap
Built-in strap ensures forces during a fall are distributed properly for added safety and comfort.

Quick-Connect Buckles
Provides one-handed operation for fast, easy donning. Pass Thru and Tongue Buckle also available.

Delta™ Pad
Patented design holds the shape of the harness for the ultimate in no-tangle donning.

Snap Straps on Hips
Adjustable snap straps hold the vest to the harness and eliminate bunching of the vest.
