

Accumulation Centers FOR SPILL CONTROL

Environmental Products

Industry's first spill control solution made from recycled content which has been independently validated by UL Environment

- Made from up to 100% post industrial recycled polyethylene
- Exceptional corrosion and chemical resistance, no leaks
- Thick, sturdy removable grates
- Low profile, modular system for flexible layouts
- Optional Sump-to-Sump™ Drain Kit allows for continuous sump to reach high sump capacity requirements

Control messy, slippery spills and keep workplaces clean.

EcoPolyBlend™ Spill Trays are made of 100% post-industrial recycled polyethylene. They're ideal for catching and containing drips and leaks from small equipment, vehicle batteries, or pouring and filling activities. Lightweight and durable, these rigid polyethylene (HDPE) spill trays have excellent chemical resistance and make clean-up a snap. They feature a ribbed bottom and are rated for service temperature between -30° to 120°F (-34° to 49°C), making them suitable for indoor or outdoor use.
