**Add to your  
harness for  
ultimate  
comfort  
and  
no-tangle  
donning**

*Patents Pending*

***The unique accessory Delta® Comfort Back Pad fits most harnesses on the market, providing you with true comfort and no-tangle donning!***

- An accessory pad that will make your harness comfortable and easy to put on - something you'll want to wear.
- Innovative design provides added comfort throughout shoulders and back increasing productivity and improving safety.
- Fits Delta No-Tangle™ harnesses and most other full body harness brands.
- Fast and easy installation and removal with built-in Velcro fasteners - it's even washable!
- Built-in lanyard keepers on each shoulder keeps the lanyard up and away during non-use.

**Ultimate Comfort** The Delta Comfort Back Pad is a great comfort accessory for your harness, enhancing worker satisfaction, productivity and compliance. It can be attached to Delta No-Tangle™ harnesses and on most other harness brands making it a truly universal fit. The innovative design provides extra comfort throughout the neck, shoulders and back. The one piece design eliminates shoulder pad slippage - they stay in place and will not slide off. The extra padding will help distribute weight, keeping the pressure off, even when wearing heavy tool belts.

**No-Tangle Donning** You can quickly and easily don a harness with the Delta Comfort Back Pad. The fool-proof system holds the shape and form of the harness, making it easier to differentiate the front from the back. This added comfort and ease of donning will greatly increase worker acceptance and reduce the possibility of improper usage.

**Simple Installation & Removal** The Delta Back Comfort Pad is easily installed onto most harnesses with the built-in Velcro fastener flaps. The pad is also removable and washable for easy harness inspection and cleaning.

**Built-In Lanyard Keepers** When you're moving from one location to another, the built-in lanyard keepers keeps your lanyard close to your body and away from your legs helping eliminate dragging, snagging and trip hazards. It even incorporates a "snap-away" safety feature; if the lanyard gets snagged on something, it will break away from the keeper allowing you to keep your balance.
