

RECOMMENDED USE	At doorways, starter rooms, packaging areas, laboratories, employee locker rooms, break rooms, refuse areas and receiving rooms-any place where spread of contamination needs to be limited
MATERIAL	Natural rubber compound
THICKNESS	3/4"
STOCK SIZES	2' x 3'
COLORS	Black

THE ENTRANCE DISINFECTANT MAT

- **Thick surrounding border stands 1/4" higher than finger-scrapers to contain liquid disinfectant. Mat holds a full gallon of disinfectant solution. (Note: use quaternary ammonium, iodine, chlorine or any other sanitizer but always test its concentration. Most sanitizers are concentrated and must be diluted before use in a footbath. Follow label directions for appropriate dilutions).**
- Natural rubber compound for general purpose applications
- This mat cleans and sanitizes shoes, recommended at entrances to all food processing areas
- Thousands of flexible fingers provide an automatic scrubbing action that dislodges contaminants from footwear. As traffic passes, rubber tips bend under pressure to immerse soles in disinfectant solution, a double action that keeps contamination from reaching food processing areas
- Convenient mat size that fits most doorways
- Suction cups on underside prevents mat from shifting.
- Made of tough rubber compound designed to resist most chemicals and variations in temperature.
