Roof Anchor

For Wood and Metal Decking

This anchor was designed with jobsite flexibility in mind, it can be attached to both wood and steel!

- Roof anchor can be attached to both wood and steel for complete jobsite flexibility.
- Fasten to metal decking with or without a purlin or structure directly underneath - for wood it must be fastened through the decking, into a truss or structural member.
- Will accommodate a 30 ft. or 50 ft. Ultra-Lok® self retracting lifeline (SRL) - order separately.
- Rotates 360 degrees for total protection
- Additional D-ring anchor point for connection of a lanyard, lifeline or Sayline™ synthetic horizontal lifeline.
- Fall arrest rated for added safety.
- *Model: 2105683 - Roof anchor for wood and metal decking (order SRL separately)*
