

OUR PORTFOLIO

Educational

Air quality is an important part of an effective learning environment. This is why many of our education clients choose DuctSox because of its superior air dispersion capabilities.

Suspension Options for Low Ceilings

The Surface Mount DuctSox is an option for low profile applications where flush mounting to the ceiling and/or wall is required. Applications can vary from environments such as classrooms and laboratories to office settings where low ceiling heights are common. Anodized aluminum flush mounted tracks are easily anchored to fixed ceiling surfaces or installed to a T-Bar grid system using standard mounting clips provided by DuctSox. The cord-in feature helps maintain an inflated and pleasing appearance even when deflated. Standard diameters are 14", 18", 22", 26", 30", and 34". The air inlet to a Surface Mount DuctSox can be either top-down through the ceiling or from the side through the wall.

AIR PORTFOLIO

Gyms/Fitness

Exercise and air quality go hand in hand. Using DuctSox in gymnasium/fitness applications creates the proper amount of continuous air dispersion to ensure a comfortable atmosphere for all members.

OUR PORTFOLIO

Retail/Commercial

"Not having to use paint, adhesives, sealants, and other processes associated with metal duct that introduce pollutants to your air distribution system will always be a green factor."

Stephen Wagner
Mechanical Engineering & Construction Inc.
Baltimore, MD

OUR PORTFOLIO

Pools/Waterparks

"We're really pleased how it performs and looks, especially the custom earth-tone color that coordinates with the rest of the space. It's designed to resist corrosion, so it's really a good choice for this type of space."

Raymond E. Bolton, AIA, Principal

OUR PORTFOLIO

Manufacturing/Warehousing

"Once other engineers realize fabric duct's value in a project such as this, I think you'll be seeing a lot of other industrial plants adding these types of cooling and IAQ benefits for employees."
