Remote Control Damper (WRCD) and Wireless Remote Control

One piece of heating and cooling equipment often services more than just one room or office. Differences in both climatic exposure as well as personal needs can result in an uncomfortable environment for some occupants. No matter how well a system is designed and balanced, providing comfort to individuals is an unending task.

The model WRCD Damper uses a wireless remote control to incrementally open and close a volume damper allowing the occupant total control over their comfort. It is a 24 volt powered damper that is designed to install between a lay-in diffuser and the supply duct for the purpose of regulating the volume of airflow into a specific space. Easily installed, the WRCD is designed to be a quick cure for areas where occupants require the ability to frequently adjust the airflow.

Features

- Designed for use with Wireless Remote Control
- The occupant can adjust the room airflow from any location in the room
- A new and unique cure to an old and continual problem.
- The WRCD eliminates the employee's desire to constantly adjust system controls which can result in higher heating and cooling costs.
- New product to add value for the Commercial Service Contractor.

ORDERING INFORMATION

Item#	Code	Description
35097	WRCD6R	6in Round Remote Control Damper with Wireless Remote Control
35098	WRCD7R	7in Round Remote Control Damper with Wireless Remote Control
35099	WRCD8R	8in Round Remote Control Damper with Wireless Remote Control
35102	WRCD9R	9in Round Remote Control Damper with Wireless Remote Control
35103	WRCD10R	10in Round Remote Control Damper with Wireless Remote Control
35104	WRCD12R	12in Round Remote Control Damper with Wireless Remote Control
35092	RMWRCD	Replacement Motor For WRCD Remote Control Damper
35095	WRC	Wireless Remote Control

Damper also available without remote

All WRCD Remote Control Dampers require connection to a 24 volt source
