

Compact pH measuring instruments with innovative probe engineering

Experts are our favourite customers

Dettel Higgelke,
Head of the
Testo Academy

...because they know what they are doing. We offer you our support with our field-oriented trainings on measurement procedures, stipulations and on physical cohesions.

Even more important is the exchange with other specialists from your branch. After all, we are dealing with your competence and your professional routine when using our instruments.

By the way: 98% of our training participants fully recommend our seminars and training.

pH1 probe head for liquids, not affected by water on account of dual wall (diaphragm) and leak-proof (gel electrolyte)

Also with pH2 probe head for viscoplastic materials

Leak-proof storage gel

Calibration bottles with practical dosing chamber
No contamination of storage solution
Always the correct buffer quantity
Buffer solutions are DKD certified
