

Tierra™ Wall Finish

A smooth plaster finish with a flecked earthen plaster effect.

The look of natural earthen plaster. Visible natural minerals create a warm finish that takes on the appearance of weathered stone or smooth concrete. For detailed application instructions [click here](#).

Tierra™ is a 100% acrylic polymer based, opaque, crack resistant, trowel applied plaster finish with natural earthen components.

Uses

Tierra™ may be used for interior or exterior applications over properly prepared substrates, including new or existing drywall and new or existing plaster substrates. Tierra™ may be used as an exterior finish over properly prepared stucco basecoats. A reinforcing fiberglass mesh may be installed to minimize cracking.
