

KLEENFIT

PREPARED FITTINGS

- MEDICAL FACILITIES
- FOOD PROCESSING PLANTS
- MANUFACTURING
- CLEAN ROOM APPLICATIONS
- RESEARCH LABS

Elkhart Products features a line of copper fittings specifically designed for use in medical and clean environmental applications. These fittings can be used in the production, storage, and distribution of volatile gaseous materials or med gases in a wide variety of industries including gas, air compressor and vacuum systems. Each fitting is manufactured to strict quality standards and meet all NFPA 99C and CGA G-4.1 standards. Fittings are cleaned to remove all oil, grease and other oxidizable materials and are individually bagged to prevent recontamination prior to use.

Why use Elkhart Products KleenFit line of products?

- Fittings meet or exceed NFPA 99C and CGA G-4.1 standards
- Reduces combustion reaction causing damage to equipment or personnel
- Provides greater flexibility in materials used to manufacture vacuum pumps, dryers, regulators and aftercoolers
- 100% of fittings are thoroughly inspected prior to shipment

KLEENFIT

PREPARED FITTINGS

KleenFit™ fittings from Elkhart Products provide the perfect solution for plumbing contractors that take pride in their work. Each fitting is brightly polished and cleaned of oil or grease and when installed, provides concerned homeowners or contractors the satisfaction the system was installed correctly, while providing trouble free service year after year. KleenFit fittings are available in all diameters and are packed individually to meet all of your plumbing requirements.

For the contractor that takes extra pride in his work.

Perfect for use in commercial or residential applications.
