AUTOMATIC SPRINKLERS
MODEL GL4210
PENDENT
RECESSED PENDENT**

DESCRIPTION AND OPERATION

The Globe Model GL4210 Residential Sprinkler is a low profile yet durable design which utilizes a 3mm frangible glass ampule as the thermosensitive element. It features both economy and aesthetics.

The combination of the 3mm frangible glass ampule and specially designed deflector make the Model GL4210 Residential Sprinkler the ultimate in life safety and fire control. The Globe Pendent and Recessed Pendent Model GL4210 Residential Sprinklers have met the strict requirements of Underwriters Laboratories Inc. as described in the UL Standard for Residential Sprinklers for Fire Protection Service, UL 1626, and should be used accordingly.

The heart of Globe's Model GL4210 sprinkler proven actuating assembly is a hermetically sealed frangible glass ampule that contains a precisely measured amount of fluid. When heat is absorbed, the liquid within the bulb expands increasing the internal pressure. At the prescribed temperature the internal pressure within the ampule exceeds the strength of the glass causing the glass to shatter. This results in water discharge which is distributed in an approved pattern.

TECHNICAL DATA

- See reverse side for Approvals and Specifications.
- Temperature Rating - 155°F (68°C).
- Water Working Pressure Rating - 175 psi (12 Bars).
- Factory tested hydrostatically to 500 psi (34 Bars).
- Maximum low temperature glass bulb rating is -67°F (-55°C).
- Frame - bronze • Deflector - brass • Screw - brass
- Bulb seat - copper • Spring - nickel alloy • Seal - teflon
- Bulb - glass with alcohol based solution, 3mm size.
- Escutcheon Assembly - steel
