Floor Racks

The Atlas Sound Folded Metal Assembly design incorporates an innovative "Radius" look characterized by sleek corners and seamless joints. This new look blends effortlessly in today's ergonomically designed office environment. A wider footprint of over 24" offers installers the luxury of more available working space, particularly valuable in wire management applications where space is often inherently limited.

The Atlas Sound FMA Series features completely redesigned "hat" sections for added strength & greater versatility in rack rail positioning. The hat sections include a rack rail slot along with holes spaced the entire length of the hat section to allow for easy, secure positioning of the rack rails. This newly designed hat section is also spaced in the cabinet to allow the installation of standard 19" blank panels vertically inside the cabinet. This is perfect for "stick-on" type accessories like Atlas Sound DC power supplies & relays. Hat sections also feature slotted cut-outs for clean, organized wire management.
