Looking for an amplifier to suit a large retail, commercial, or industrial paging and background music application? Look no further than the Atlas Sound AA120 amplifier. This powerful 120 watt amplifier was engineered with unique features to assist the contractor or installer in today's commercial business audio environment. **This six input unit features extensive muting and output options along with a very unique bridge in/out feature to allow combining of multiple amplifiers in ballroom applications without the need for external relays.** VCA control is included which may be assigned to the BGM input or globally for the entire amplifier. For higher output requirements, the model AA240 is available with the same preamp section as the AA120, but with a larger 240 watts power amp section.
