

# PVC Sewer Fittings

When you bury a PVC sewer fitting you only want to bury the “best”. You can’t afford to go back on a job site to dig up a broken and leaking fitting. When you install Mueller PVC sewer fittings, you are installing the “best”. Each fitting has benefited from years of testing and development, creating some of the strongest PVC sewer fittings on the market. Mueller PVC sewer fittings undergo some of the same rigorous testing and dimensioning that goes into our pressure and DWV fitting lines. Couple that with the virgin material we use and you can see why Mueller PVC Sewer Fittings are clearly above the rest; even when resting below ground!
