

Wheatland API 5L Line Pipe

Since 1990, Wheatland Tube Company has been the only domestic producer of continuous furnace weld pipe licensed by the American Petroleum Institute to apply the official API monogram to its continuous furnace weld pipe.

API 5L covers welded and seamless steel pipe commonly used to convey gas, water, and oil. Hydrostatic test pressures for each size are prescribed in the specification. Pipe made in accordance with API 5L is stamped with the API monogram. API 5L is suitable for treading and welding.

Make sure it's quality. Make sure it's Wheatland.
