SummitView™ Essentials Kit

Complete Solution For Simplified AV Signal Distribution & Media/Room Control

Kramer has designed a complete and elegant solution for simplified AV signal distribution and media/room control in classrooms, training rooms and presentation rooms. Our line of SummitView™ is as easy to use as it is to specify and install. The SummitView™ Essentials Kit includes everything needed for a complete installation – the SV-551 switcher/processor, an intuitive room controller, wall plates, audio amplifiers, speakers, and all the necessary cables. SummitView™ uses economical CAT 5 twisted pair cable to conveniently transmit all audio, video signals. You can also readily customize any SummitView™ installation by adding additional components from the SummitView™ line. With SummitView you get everything you need for a easy to use, yet high end integrated media system – just add the displays and sources.

KITS CONTENT

- SummitView™ Processor / Switcher - SV-551.
- Room Controller - RC-63DL.
- Wall Plate Devices - SV-301 & SV-302.
- Recommended Speakers (optional) - SPK-CC444 (pair).
- All Required Cables - For full details of the Essentials Kit, see the detailed contents list.

DETAILED CONTENT LIST

SV-551:	1 SummitView™ Processor/Switcher.
