Control4® 4-Zone Amplifier and 8-Zone Amplifier

Control4® 4-Zone Amplifier C4-8AMP1-B
Control4® 8-Zone Amplifier C4-16AMP3-B

Control4 amplifiers provide high-quality sound to four or eight audio zones from distinct sources. Regardless of the size of your home or project, you'll enjoy a powerful, multi-room music solution that's fully integrated into your Control4 system. Both amplifiers offer full matrix switching, advanced parametric equalizer, independent input gain control and volume limiting capabilities.

- The 4-zone amp lets you enjoy 60W of high-quality sound from 4 analog and 2 digital input sources in 4-speaker output zones.
- The 8-zone amp offers 120W of high quality sound from 8 analog input sources in 8-speaker output zones.
- The 4-zone amp supports Auto Power-Save mode—when it's not in use, it drops into energy-conservation mode using just 2 watts of power.
- Tweak the sound on any speakers using the parametric equalizer. The Control4 Equalizer app lets you view and adjust a range of settings from on-screen and touch-screen devices.
