

PT-110/PT-110EDID/PT-110-od

Computer Graphics Video over Twisted Pair Transmitters

NEW

Compatible with HDTV component video signals when used with a breakout cable such as the Kramer C-GM/3RVF.

The **PT-110** is a twisted pair transmitter for computer graphics video signals. It converts a computer graphics signal into a twisted pair signal that is converted back to a computer graphics video signal when used with a compatible receiver. The EDID model stores and recalls a default EDID setting in memory and the "od" model is protected from EMP voltage surges.

FEATURES

- Max. Resolution - WUXGA & 1080p.
- HDTV Compatible.
- EDID Capture - Copies and stores the EDID from a display device (PT-110EDID and PT-110-od).
- EMP (Electromagnetic Pulse) - The PT-110-od (when used with the TP-120-od) protects from voltage surges induced by the electromagnetic field of nearby lightning. The system does not protect against direct lightning strikes.
- Sync Polarity Settings - H & V switches for improved display compatibility with the CAT 5 outputs.
- System Range - Up to 100m (320ft). Greater distances possible depending on resolution and cable.
- Cable - STP (shielded twisted pair) such as CAT 5. For optimum range and performance, use Kramer's BC-DGKat524, BC-DGKat623 or BC-DGKat723 cables.
- Power Connect™ System - A single connection to the transmitter or the receiver powers both units when the devices are within 150ft (50m) of each other.
- Ultra Compact Pico TOOLS™ - 4 units can be rack mounted side-by-side in a 1U rack space with the optional RK-4PT rack adapter.
