The Power of Clean

Phoenix 26 Eco

26" Economical Walk-Behind Scrubber

The Phoenix 26 ECO is a compact disc brush scrubber with a 26" cleaning path. It is a traction drive model covering 26,000 sq. ft. per hour (2,415m²). The sleek design provides an excellent line of sight and the compact design results in total operator comfort by focusing on ergonomics. Easy-to-understand controls ensure that the machine is simple to operate. This machine has adjustable speed regulation, an offset brush head for greater view and adjustable hand rails. The Phoenix 26 ECO features 12 gallon solution tanks and 13 gallon recovery tanks. The recovery tank is easy-to-clean and hygienic while the Anti-Foam System (AFS) protects the vacuum motor from damage. An on-board charger is convenient and allows the machine to be charged anywhere. As an added safety feature, when the on-board charger is plugged in, the machine is not operable. Brush loading/unloading is as easy as the turn of a switch. The operator never has to manually remove the brushes. Squeegees have also been designed so that no operator adjustment is necessary. A low brush deck design is ideal for cleaning underneath obstacles such as shelves, warehouse racks and other stationary objects. The Phoenix 26 Eco is a cost-effective solution for cleaning large areas.

Offset Brush Head: The offset brush head allows for greater viewing of the area to be cleaned and allows for easier access along walls and underneath low profile objects.

Aqua-Stop Solution Control with Aqua-Saver: Aqua-Stop is specially designed to allow significant reduction in water and chemical usage while increasing productivity by improving run time per tank, and improving the overall cleaning result. Aqua-Saver is a new added feature with adjustable water flow with pre-set setting allows for maximum use of solution tank cutting operator expense. Aqua-Saver setting will save water, chemical and money; while allowing for less tank refilling. When operating in Aqua-Saver mode you can clean equal to the larger 26" walk behind scrubbers.

Specifications

Cleaning path width	26 in (65 cm)
Brush or pad holder	(2) 13 in (33 cm)
Squeegee width	35.4 in (90 cm)
Theoretical productivity	35,464 ft ² /hr (3,294 m ²)
Working speed	3.1 mph (5 km per hr)
Rated voltage	24 volts
Vacuum flow	65 cfm (110 m3/hr)
Vacuum waterlift	45 inches (112mbar)
Vacuum power	.60 HP (450 W)
Drive motor power	1/5 HP (150 W)
Brush type	Disc
Brush motor(s) power	3/4 HP (2)
Number of brushes	2
Brush RPM	180 RPM
Solution capacity	12 Gal (45 liters)
Recovery capacity	13 Gal (49 liters)
Weight with batteries	372 lbs (169 kg)
Weight without batteries	238 lbs (108 kg)

Green Features

- Sound level ≤ = 70dBs
- Maintenance free gel batteries available
- Tool free brush removal
- Tool free squeegee removal
- One button operation
- Ergonomically designed for ease of use
- Aqua-Stop
- Aqua-Saver
- Pre-set water flow setting allows for maximum use of solution tank cutting operator expense
