

SOCS, PILLOWS & DRUM COVERS

FOR ABSORBING LEAKS AND SPILLS AROUND MACHINES

SOCs, Pillows & Drum Covers

Specialty absorbent products including SOC, pillows and drum covers can be used around a facility when a pad or roll may not be sufficient. These flexible absorbents allow you to place the absorbent exactly where you need it.

Absorbent SOC are dependable, flexible tubes that contain and absorb liquids. SOC mold around corners and conform to uneven surfaces to soak up spills and drips, preventing fluid from escaping to other areas.

Absorbent pillows are ideal for use under the bottom of spill pallets or machines that are known to drip or leak. Pillows are easy to retrieve, and can soak up oil and water-based fluids in hard-to-reach areas such as sumps, catch basins or even outdoor ponds.

Absorbent drum covers eliminate the messy drips and overflow when mixing or pumping liquids from the drum barrel. SPC drum covers keep drums, the floor and surrounding storage areas dry and clean.

Recommended for:

- Wrap a SOC around your machine to stop leaks from reaching the floor
- Place a pillow in a tight space between machines to catch splashes or overspray
- Keep drum storage areas clean and dry with pre-cut drum covers
