GRAIN MASTER SERIES

ALUMINUM HOPPER BOTTOM FARM GRAIN WAGON

- **KANN** has been producing the highest quality, most durable all welded aluminum grain truck and trailer bodies for over 30 years! A testament to this fact is that many of the original **Kann** bodies are still hauling grain today!
- The **KANN** corrugated continuous single piece structural wall design along with the all welded aluminum construction, means there are no seams, bolts or rivets to break, crack or loosen...the all aluminum body also means less corrosion than steel and will never have to be repainted!

- The **KANN** Grain Wagon, unlike all other grain wagons on the market today, utilizes actual semi trailer axles and suspensions that will provide decades of problem free use and service from field to farm or elevator!
- **KANN** Grain Wagons feature a steerable front axle that provides great maneuverability either in the field or over the road reducing tire wear and body stress under heavy loads. The steerable front axle can also be locked when backing!
