Stabilizer Legs and Arms Lock Onto Rear Load Containers

REFUSE & RECYCLING BODY COMPANY

PATENTED KANN ADAPTER (KA™)

Also available to be retro-fitted to many competitive front loader units!

The **KANN Adapter** was designed to allow existing front load trucks to collect both standard front load and rear load containers up to 6 YD³ capacity that meet ANSI Z245.6 standards.

The flexibility of the **KANN Adapter** to handle different containers increases the versatility of your front load units. The KA™ is ideal for companies who are growing through acquisitions and find themselves with routes that do not match

their long term objective to using more efficient front load equipment.

The **KANN Adapter** is a very good investment. It can eliminate the need to purchase new trucks to handle rear load containers. In addition to the reduction in rolling stock investment, the KA™ allows a company to pick up both front and rear load containers through attrition rather than a large one time capital expenditure. The KA™ is available for most front load commercial and residential models on the market.

FEATURES

GENERAL

- 1.25 IN T1 plate 110,000 tensile, high strength forks
- Durable 2.5 IN diameter lock cylinder, 3 IN stabilizer diameter
- SAE 100 R2 type AT hydraulic hoses
- Air controls and hydraulic valves compatible with most existing systems
- 2000 LB load limit for rear containers; 6 YD front slope
- Able to be mounted on new or used front loader
- Factory installation

OPTIONS

CONTROLS

- Electric
- Variable compaction pressure

PAINT

- Standard PPG other than white
- Metallic
- Multi-color
- Striping

The KA™ allows front loaders to also access rear load containers.

The KANN Adapter can be installed on KANN front loaders as well as most competitor units.
